The cam position sensor is critical to the proper functioning of the engine management system in its timing of engine events. The sensor delivers information on the position of the camshaft that actuates the engine's intake valves to the computer, which uses that information to deliver fuel and spark at the correct time. The Audi TT was launched in 1998. This car is a 2-door sport car. It was available in two body styles: a 2-seat roadster and coupe. Both roadster and coupe possess the Quattro all-wheel drive and a 6-speed automatic gearbox, a manual one is not available on this model. Audi Diagnostic Trouble Codes DTC Table - General: From model year 1996, vehicles manufactured for the North American market are equipped with a Government required diagnostic system known as On-Board Diagnostics II (OBD II). The Audi V8 (Typ 4C) is a four-door, full-size luxury sedan, built by Audi in Germany from 1988 to 1993, as the company's flagship model. It was the first car from Audi to use a V8 engine, and also the first Audi to combine a quattro system with an automatic transmission.
