

Download Information Theory Solution Manual

Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science. Compiled, OCR'd, and Edited by Patrick Lannigan - Winter 2004. WARNING: This "Theory and Practice of Selling the Aga Cooker" document is absolutely sexist. In mathematics, approximation theory is concerned with how functions can best be approximated with simpler functions, and with quantitatively characterizing the errors introduced thereby. 6. Fingerprints - Screening and Similarity. Similarity measures, calculations that quantify the similarity of two molecules, and screening, a way of rapidly eliminating molecules as candidates in a substructure search, are both processes that use fingerprints.
