(~-----lDaniel has produced a wonderful interactive spreadsheet which generates Times Table challenges for children. It is easy to differentiate and can be used for produced printed activity sheets, or for display on an interactive whiteboard screen.Created Date: 2/1/2013 7:36:15 AMThis worksheet is differentiated by task and outcome: the aim is to answer as many times tables questions as possible in five minutes. The level of difficulty of the questions is configurable, and a new set of questions is generated each time the spreadsheet is opened.
